PREFACE

This report supplements [] Svobodnyy ICBM Complex, USSR
1/ prepared in response to CIA Requirement C-DI5-82,972 requesting detailed
line drawings, to scale, of elements of the complex. The information contained
herein is based on [] photography through []
Individual reports will be updated periodically to reflect changes observed on
subsequent photography.

25X1

25X1

The precision target plots included in this report are mathematically rectified projections of the area. Plots are compiled by utilizing precision mensuration instruments, and image interpretation is performed with the aid of stereoscopic viewing equipment. Identifiable image points are measured and their coordinate values mathematically transformed by computer. This transformation corrects for camera and attitude (pitch, roll, and yaw) induced distortions, but does not correct for displacement due to ground relief and object height.

These target plots represent the most accurate data compiled to date, but the user is cautioned to exercise care in scaling distances or determining azimuths from these plots, because relief can introduce errors in distance and alignment. Dimensions are accurate to within []

25X1

[] whichever is greater.
